ACS/H-CP-EXT-IP66, Panel Extension Cable Kit – IP66
Insert Installation Instructions – Preferred Thermal Installation

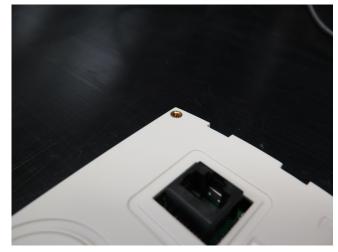

1. Have a panel and two inserts.

2. Place the insert to the hole.

3. Heat the soldering iron to 350°C and heat the insert for two seconds.

4. Push the insert into the hole with the hot soldering iron. Make sure the insert is in level with the panel's back cover

5. Repeat the steps 2-4 with the other insert in the opposite corner.
